ANNEX 1.	15

1. TITLE:

Protocol on health protection and prevention against COVID-19 in training and/or competition of the Andalusian Rowing Federation (FAR, as abbreviated in Spanish).

2. SCOPE OF APPLICATION

a) This protocol shall apply to the rowing disciplines practised in the FAR, namely:

- Olympic rowing
- Fixed seat rowing
- Yawl rowing
- Coastal rowing
- Indoor rowing

The existing age groups in the federation are:

- Junior under 11
- Junior under 13
- Junior
- Under 23
- Senior
- Master

b) Risks of this activity.

- Rowing is a sport with no contact between the different athletes who share a boat. There is usually a distance of about 13 meters between the different boats, which is required by the size of the oars and the division of the race course. The crews are arranged in such a way that there is a distance of approximately one meter between each rower, this means that the rowers exhale air on the back of the neck of the one before him/her and never on the face of a team mate. Lateral distance between rowers in fixed seat boats is smaller than one meter, and there is no contact between the athletes. In the case of crews with coxswain, the latter faces the first rower and there is no contact between them. As regards indoor rowing, which is practised using a device that simulates rowing, there is no contact with other athletes either. Therefore, each rowergometer may be placed at any distance with respect to the rest of devices.
- Of course, all the boating disciplines are practised outdoors on the water, and this may include rivers, reservoirs, and the sea. As regards indoor rowing, this is usually practised in fitness centres, but outdoor facilities may be used too.
- Rowing is not a professional sport in Andalusia.
- The number of athletes in a crew is different according to boat class:
 - Olympic rowing, with crews of 1, 2, 4, and 8 rowers, with a coxswain.
 - Fixed seat rowing, with crews of 4, 6, 8, and 13 rowers, with a coxswain.
 - Yawls, crews of 4 rowers and a coxswain.
 - Coastal rowing, with crews of 1, 2, 4, and 4 rowers, with a coxswain.

FEDERACIÓN ANDALUZA DE REMO
(*ANDALUSIAN ROWING FEDERATION*)
Estadio de La Cartuja, Pta. F;
41092 Seville
Phone number: 954 462 071

E-mail: secretaria@remoandaluz.es
www.remoandaluz.es

- Indoor rowing, one single rower.
- The number of participants in training sessions and competitions is different. Training sessions are different from one crew to another, and each club arranges such sessions in a different manner, so its athletes may practise in just one boat or in groups of boats under the supervision of a coach in a boat that may be motorised or not. In the case of competitions organised by FAR, the number of participants may be very different from one event to another; however, this number ranges approximately from 200 and 500 athletes.
- There is usually an audience attending these events. However, this audience is not too large; for example, in the case of lower category competitions, the audience is formed by the athletes who are not competing in that particular moment and their relatives. In any case, the events may be organised without audience. There is no audience attending the training sessions.

3. PURPOSE

The purpose of this protocol is to prevent and mitigate COVID-19 contagion during the rowing training sessions and/or competitions organised by the Andalusian Rowing Federation.

4. PROTOCOL PROMOTERS

4.1 AUTONOMOUS REGION DEPARTMENT:

Department of Education and Sport.

4.2. FEDERATION:

Andalusian Rowing Federation.

Person in charge: Javier Cáceres Espejo (President).

Contact phone: 607779094

5. RECOMMENDATIONS

5.1 GENERAL RECOMMENDATIONS.

- a. Employees and sport coaches working in sports facilities or during the events organised by the Andalusian Rowing Federation.
 - Hand hygiene: Frequent hand washing is recommended, hydro-alcoholic gel dispensers, and single-use hand drying paper will be available at the access to the facilities and in the boathouses. Additionally, containers with disposable bags will be provided to collect used paper.
 - Social distancing. A distance between persons of at least 1.5 meter is recommended, in case this is not possible personal protection equipment shall be used.
 - The use of a mask indoors is mandatory. Coaches may discard this use if they are alone in the motorboat, but they shall use masks if there are other individuals in the boat.
 - The cleaning personnel must use PPE at work and when performing waste collection, as mandated by the relevant occupational risk prevention services.

These preventive measures (both personal prevention and contact limitation measures) shall be also applied to cleaning personnel who may be hired by the management of the event, or if it is required, in case external companies are hired to perform these duties.

- When coughing or sneezing, cover your mouth and nose with the bend of your elbow.
- No personal items, such as tools or work utensils, shall be shared. If they have to be shared, they must be properly disinfected between uses. The motorboats shall be disinfected if the pilots are shifted during the workday, and in any case they shall be disinfected at the end of the day, especially the areas of heavier hand use, such as the steering wheel, helm, starter, and throttle.
- The measures provided for in section 7 in Royal decree-law 21/2020 of 9 June on workplaces. The decree provides the following:

1. Without prejudice to the fulfilment of the occupational risk prevention regulations and other applicable labour regulations, the business owner or, if applicable, the manager of the workplaces and entities, shall:

a) Apply ventilation, cleaning, and disinfection measures appropriate to the characteristics and use intensity of workplaces, according to the protocols established in each case.

b) Make available to workers water and soap, or hydro-alcoholic gels or disinfectants with virucidal activity, authorised and registered by the Ministry of Health for hand washing.

c) Adapt the working conditions, including workstation and shift arrangements, as well as the use of public areas in such a way that a minimum distance of 1.5 meter between the workers is ensured. In those cases where this is not possible, the workers shall be provided with protection equipment appropriate to the particular risks.

d) Apply measures to avoid crowding of workers and customers or users in workplaces during the time slots in which larger attendance is likely to occur.

e) Apply measures for the gradual return to on-site work and the promotion of remote working when this is possible due to the nature of the work activity.

2. People with symptoms compatible with COVID-19, or who are in home isolation due to a diagnosis of COVID-19, or who are in home quarantine due to close contact with someone with COVID-19, should not go to their workplace.

3. If a worker begins to have symptoms that are compatible with this disease, he/she should immediately contact the telephone number authorised for this purpose by the Regional Department of Health, 900 400 061, or the relevant health centre, and, where appropriate, the corresponding occupational risk prevention services. Immediately, the worker shall put on a mask and follow the recommendations given to him, until his/her medical condition is assessed by a health professional.

b. Measures to be followed by the users of the facilities, both athletes and audience.

- Hand hygiene. Frequent hand washing is recommended, hydro-alcoholic gel dispensers, and single-use hand drying paper will be available at the access to the facilities, in the boathouses, and in the areas prepared for the audience, in case there is an audience attending the event. Additionally, containers with disposable bags will be provided to collect used paper.
- Social distancing. Physical contact of athletes before boarding the boats shall be avoided, and a minimum distance of 1.5 meter between them shall be kept. Once they

are in the boat, physical contact shall be avoided, so the distance available due to boat length and seat arrangement shall be kept.

In case there is an audience, minimum social distancing of 1.5 meter shall be kept.

- Use of masks shall be required, in case the distance of 1.5 meter before boarding may not be kept by the athletes. Coxswains may use face shields too, or as an alternative to masks.

The audience, if any, must wear masks at all times.

- When coughing or sneezing, cover your mouth and nose with the bend of your elbow.
- Rowers shall not share sports equipment, such as pads, straps or oars, and in case this is shared, it shall be disinfected between uses. No food and drinks shall be shared.
- The use of changing rooms, toilets and showers is allowed, always observing social distancing measures. They shall be of individual use if the surface area is up to 4m², unless the assistance of another person is required. Where these facilities are larger than 4m², maximum capacity shall be limited to 50% of the cubicles in place. Usage areas shall be marked to ensure social distancing.

c. Cleaning and disinfection of sports areas.

- Cleaning and disinfection of sports areas, changing rooms and toilets shall be carried out at least twice a day using virucidal disinfectants authorised and registered by the Ministry of Health. Sports equipment such as oars, boats, seats and handles of ergometers and miscellaneous gym equipment shall be disinfected after each use.
- Maximum ventilation of sports areas and boathouses shall be kept before, during and after each activity.
- When cleaning sports facilities, special attention shall be paid to the disinfection of doorknobs, handrails, counters and areas of frequent handling.
- Containers for the disposal of hand drying paper, water bottles and other waste shall always be provided with a bag, which shall be closed when collected and placed in another bag before being disposed of in the waste containers.
- The bins located in the different areas ruled under this protocol, as well as any additional ones that may be placed, shall be collected, cleaned and disinfected at least twice a day, and also collected when they are close to being filled.
- In order to make a safe use of the facilities, athletes shall avoid crowding, the practice of sports shall be arranged in turns and the capacity restricted if the minimum social distance of 1.5 meter between individuals cannot be ensured.
- Sports centres with restaurant areas shall observe the regulations in force as regards this kind of business, and the users shall not share food or drinks.
- Usage guidelines of the sports facilities shall be posted on the centres' websites. Signs with these guidelines shall be fixed on several areas of the centres and written notes shall distributed throughout the facilities with information about the appropriate measures in each area of the facilities.

5.2 SPECIFIC RECOMMENDATIONS FOR ROWING SPORT.

5.2.1 HEALTH MEASURES WITH REGARD TO ACCESS OF ATHLETES, USE OF THE FACILITIES AND PRACTICE OF SPORT.

a. Persons with symptoms compatible with COVID-19, such as fever, cough, shortness of breath, headache, nausea, diarrhoea or any other symptoms compatible with this disease, as well as those who have had close contact with a confirmed case or are in quarantine, shall not be allowed access to the facilities.

There shall be signs at the entrances to the sports centres with information advising the public not to access in the cases above and to contact the relevant health service accordingly.

b. Information about the mandatory use of masks on entry shall be placed at the entrance to the sports centres, additional information on the use of masks as required by this protocol shall be provided too.

At access points, the entry and exit flows of people shall be marked and placed at a distance to avoid crowding. Gyms and boathouses shall have capacity limits so social distancing measures may be implemented.

c. Daily entry and exit control records shall be kept, they may be digital or manual and shall include the time of entry and exit of users. Such records shall be kept for 14 days, together with incident records. Hydro-alcoholic gel shall be provided at the access to facilities for hand washing, the requirement to keep a distance of 1.5 meter from other people or the mandatory use of masks if this is not possible shall be reminded.

d. Each sports centre shall have sufficient stock of such required products as hydro-alcoholic gel, sodium hypochlorite, hand drying paper and rubbish bags.

e. Informative signs shall be placed throughout the sports areas, entrance, toilets, changing rooms and main transit areas with indications to keep safe social distance.

f. The facilities disinfection shifts shall be included in these signs, and disinfection shall be performed twice a day at least.

g. Group workouts shall be limited to the maximum capacity of the gym so the minimum social distance required may be kept. In case there is an audience attending the event, posters with information about maximum capacity shall be placed. Whenever possible, telematic procedures shall be used for appointments, payments, etc.

h. Training sessions shall be held, as far as possible, in consistent groups, so different athletes may not take part in each session. This way, if there is a positive case, contacts may be limited and cases may be traced more quickly.

i. Social distancing measures in rowing shall be applied until the boarding of athletes. These measures are not required in case of athletes who live together.

j. Once the athletes are on board, self-protective measures shall be kept, so they shall avoid turning back, turning to other competitors, having celebrations, etc. Posters shall be used to raise awareness and help maintain the necessary caution.

k. Waste bins shall be installed on the pontoons to deposit disposable masks before boarding. When on board each athlete shall keep his/her mask, in case it is not disposable, together with

his/her personal belongings, but if he/she is using disposable masks, he/she shall have a spare one available for disembarking.

l. There shall be hydro-alcoholic gel available at the pontoons, so the athletes may wash their hands as required when boarding and disembarking.

5.2.1 HEALTH MEASURES WITH REGARD TO TRAINING SESSIONS OF ATHLETES.

- a) Athletes shall be informed of the need for medical monitoring if they feel fever, cold symptoms or any other symptoms consistent with COVID-19 infection or sequelae.
- b) Each sports centre shall record attendance to training sessions, and this information shall be available during 14 days for the Health Authorities if required.
- c) Both the sports centres and the federation shall follow the directions of the relevant health authority, and the athletes shall be informed about such directions.
- d) All the sports centres shall be provided with the preventive measures taken and included herein as regards training sessions, such as disinfection of equipment shared at gyms and oars and boats cleaning.
- e) Training sessions shall be held, as far as possible, in consistent groups, so different athletes may not take part in each session. This way, if there is a positive case, contacts may be limited and cases may be traced more quickly.
- f) Social distancing measures in rowing shall be applied until the boarding of athletes. These measures are not required in case of athletes who live together.
- g) Once the athletes are on board, self-protective measures shall be kept, so they shall avoid turning back, turning to other competitors, having celebrations, etc. Posters shall be used to raise awareness and help maintain the necessary caution.
- h) Waste bins shall be installed on the pontoons to deposit disposable masks before boarding. When on board each athlete shall keep his/her mask, in case it is not disposable, together with his/her personal belongings, but if he/she is using disposable masks, he/she shall have a spare one available for disembarking.
- i) There shall be hydro-alcoholic gel available at the pontoons, so the athletes may wash their hands as required when boarding and disembarking.
- j) Equipment shall not be shared if it is not essential and that to be shared shall be disinfected after use.

5.2.3 HEALTH MEASURES AS REGARDS THE RETURN TO COMPETITION, SPECIFIC ORGANISATIONAL PLAN.

- a) Organisers of recreational and competitive sport activities and events outdoors shall ensure optimum conditions as regards staggered participation, distribution and sequencing of participants for the safe conduct of these activities, with a maximum number of 500 athletes allowed. The events shall be held without audience. Media shall be allowed in the events.

b) Although no audience shall be allowed to the events, conventional sports facilities shall have a maximum capacity of 65% both in outdoor and indoor conventional sports facilities.

As regards audiences in conventional sports facilities, the limitations to be taken into account are 65% in conventional outdoor sports facilities, up to a maximum of 1,500 people, and 65% in conventional indoor sports facilities, with a maximum of 800 people. The audience shall remain seated in previously assigned seats.

Rowing events are held outdoors, since this is an inherent feature of boating. As regards indoor rowing competitions, they shall be held in indoor venues with a specific distance between the devices and venue capacity limitation as to allow the social distancing required. The minimum distance between ergometers shall be 1.5 meter.

c) Rowing does not require physical contact between athletes, so this shall be reminded on the posters and with the speakers used for the events.

d) Specific areas for clubs and athletes will be arranged, and there social distance of 1.5 meter shall be kept or masks shall be used if such a distance may not be kept:

- Areas for athletes: There shall be a delimited area for each club according to their number of competitors. There should be a minimum of 4 square meters per person, and the use of tents is recommended. As far as possible, and in the particular case of clubs with many competitors, the area should be subdivided by crews. Where this is not possible because the same athletes take part in different boat races, the competitors shall be arranged per categories, age groups, etc. or in such a way as the club may consider most appropriate to limit the total number of contacts that a person may have during the event.
Clubs shall prevent the different crews from breaching the safety distance measures. Each athletes area shall be placed at a distance of 2 meters from another athletes area and from the transit areas.
- Areas for boats: Each club shall be assigned an area for its boats and they shall keep a distance of 1.5 meters from the transit areas and 3 meters from the boat areas of other clubs. (No distance shall be kept between the particular club's boats). Each club shall bring buckets, sponges and disinfection equipment, and the sports centre where the competition is held shall provide water areas for the disinfection of boats and oars.

e) Arrangements for the meeting of delegates. One day or some days before the competition, a remote meeting will be held in which those responsible for the organization and the president of the committee of race judges will inform about safety rules, circulation pattern, how the different areas have been set up in the facilities, and any questions about race circulation pattern will be answered. On the day of the race, the meeting will be held outdoors, if possible, to clarify any issues or circumstances that may have arisen after the remote meeting, such as withdrawals, handicaps, etc. Social distance of 1.5 meter shall be kept and masks shall be worn.

f) Grounding and launching of boats. Crew boarding and disembarking.

- There shall be a circulation pattern for launching and grounding boats in which a distance of 1.5 meter may be kept in case they cross paths. Access to boarding areas shall be restricted to the crew and a coach. No more than 15 athletes may stay in every launching/grounding area. If there are two boats facing each other's sterns, a distance of 2 meters between them shall be kept.

- When performing boarding and disembarking operations, there may be more than one boat grounded on a pontoon, but there may only be a maximum of 15 athletes thereon. No other athlete may access the pontoon unless those who were in the pontoon previously have left it to row or to get out of it. There shall be a waiting area with enough room for crews of a maximum number of 15 athletes, the pontoon shall be accessed only after a judge indicates to do so. Boarding and disembarking shall be supervised by a judge. In those cases in which a boat is shared by different crews, the interior of the boat shall be disinfected by spraying 0,1 % bleach solution after every use.
- g) Boarding control. A list of crews including the time they shall check-in at boarding control will be issued. The coxswain in coxed crews shall wear a mask and hand over the ID cards to the umpire. The organisation staff will monitor that there are no groups of people in the waiting areas.
- h) Weighing of coxswains. Coxswains shall be weighed as usual, but this time they shall use a mask. Once each weighing is complete, the scale shall be disinfected with a virucidal solution.
- i) Umpires.
- Start and finish. Minimum interpersonal distance of 1.5 meter shall be kept and masks shall be used as long as it is possible. Each one will have its own assigned equipment (megaphone, stopwatches, radio station, pens, etc.), and it shall be disinfected if necessary for shared use (especially the megaphone).
 - Umpires in the race course. Only the pilot and the umpire may be on the umpire's boat. The pilot of the boat shall wear a mask at all times. The umpire shall wear a mask when he/she considers that this does not affect his/her work and he/she shall take care of his/her equipment so, once his/her job is complete, he/she shall disinfect it with special attention to the megaphone.
 - Boarding control. The boarding control judge shall arrange the entrance and exit of the crews keeping the social distance established with the athletes and shall use a mask.
 - In the event of a claim. In the event of a claim to be dealt with in a meeting of both the committee of judges and the race committee, the sports centre organising the event shall make available a space with enough capacity for 5 people to meet while observing social distancing measures.
- J) Awards ceremony.
- The awards ceremony shall be held outdoors and the athletes are required to wear masks, the audience, if any, shall wear masks too. The athletes awarded shall try to keep a distance of 1.5 meters between them.
 - Use of gloves and masks by those handling and giving medals and trophies is recommended. However, the authorities present in the ceremony may not wear masks if the safety distance of 1.5 meters is kept (it is advisable to mark the positions on the floor).
 - The trophies shall be given by hand, with the athletes being able to remove their masks when pictures are taken; however, groups shall not be formed. Once the pictures are taken, the athletes shall put their masks on again before leaving the awards ceremony area.
 - In order to prevent crowding, the awards ceremony area shall be accessed separately by medal category and group pictures of awarded athletes shall be avoided.

k) Other preventive measures:

1. Mandatory use of masks until boarding with the exception of coxswains, who are to use them all the time. Waste bins shall be installed on the pontoons to deposit disposable masks before boarding. When on board each athlete shall keep his/her mask, in case it is not disposable, together with his/her personal belongings, but if he/she is using disposable masks, he/she shall have a spare one available for disembarking.
2. There shall be hydro-alcoholic gel available at the pontoons, so the athletes may wash their hands as required when boarding and disembarking.
3. Equipment shall not be shared if it is not essential and that to be shared shall be disinfected after use.
4. Once the athletes are on board, self-protective measures shall be kept, so they shall avoid turning back, turning to other competitors, having celebrations, etc. Posters shall be used to raise awareness and help maintain the necessary caution.
5. No water tanks to refill bottles will be available.
6. The facilities where the competition is to be held shall be disinfected at least twice a day, preferably at the end of each daily session (morning and evening), signs shall be used to indicate this.
7. Locator form (ANNEX 1): this form must be filled in prior to the competition by all the participants in the event (coaches, athletes, umpires, judges, health personnel, support staff, media, etc.). It shall describe the specific activities these individuals are to take part in (for instance, activities carried out in document registration desks, closed spaces, start areas, finish areas, etc.) in such a way as to make easier the assessment of possible close contacts during the course of the competition in the event of cases being confirmed subsequently.
8. The temperature shall be taken at the entrance to the facilities where the event is held before it is started. Signs will remind the participants to observe hygienic and distancing measures.
9. A training talk shall be given to the support staff before the competition. The audience, namely those athletes who are not taking part in the competition at the moment, since public is not allowed in the facilities, shall use masks and observe social distancing measures.
10. The competition manager shall be appointed as the person responsible for compliance of protocols, and this shall be included in the event rules.

6. SYMPTOM CONTINGENCY PROTOCOL.

In the event a person with symptoms is detected in a sports centre:

- a. The measures indicated by the Occupational Risk Prevention Service or the health authority shall be followed.
- b. The competition manager shall contact COVID-19 phone to report the incident by providing the necessary information of the person concerned and taking note of the procedure to be followed. In these cases, the information collected in the locator form shall be used.

c. Contact shall be established with the Occupational Risk Prevention Service and, if necessary, the health authorities through the appropriate Health Centre or by calling the COVID-19 phone for Andalusia (900 400 061).

d. The person concerned shall be isolated in a space within the event's medical area, where he/she shall remain until he/she is moved, ensuring basic measures, such as good ventilation of the space, use of PPE, waste management, etc. The club's delegate will be the person responsible for accompanying the person concerned by following the recommendations of the health service, avoiding physical contact and using a mask at all times.

e. Preliminary identification of contacts shall be carried out using data from daily and incident records, locator forms, ranking lists, etc.

f. In the event the activity is cancelled or the venue is closed by the Health Authority, the competition manager shall inform all the club delegates of the incident so that they may pass on this information to their respective clubs, and they shall be informed that the contacts of the person concerned shall be traced so they must wait for further instructions.

7. SPECIFIC PLAN FOR EACH SPORTS CENTRE OR FACILITIES.

Each sports centre shall draw up a specific plan to facilitate compliance with all the COVID-19 prevention measures proposed herein. A person responsible for this specific plan shall be appointed.

The plan must include the provisions of this protocol, including the individuals responsible for the following measures:

- Management of PPE.
- Cleaning and disinfection.
- Training of employees.
- Symptom contingency protocol.

The following is a checklist to ensure that all the items are covered in the plan.

	YES	NO	N/A
GENERAL RECOMMENDATIONS			
- HAND HYGIENE:			
• Gel dispensers placed throughout the facilities			
• Frequent hand washing signs			
• Single-use hand drying material			
• Disposable material bins			
- SOCIAL DISTANCING			

• Signs to keep minimum distance of 1.5 meter			
• Flow of people through the facilities			
- PERSONAL PROTECTIVE EQUIPMENT (PPE)			
• Indications to use or not to use masks according to requirements			
• Availability of masks			
- BREATHING HYGIENE:			
• Reminder signs of breathing hygiene measures			
- Personal items, tools or sports equipment shall not be shared, or they shall be disinfected			
- Limitations on the use of toilets and changing rooms			
CLEANING AND DISINFECTION			
• Cleaning and disinfection recommendations (products to be used)			
• Cleaning and disinfection shifts			
• Ventilation guidelines to observe before, during and after cleaning and disinfection			
• Cleaning and disinfection of public areas			
• Cleaning and disinfection of gym/sports areas.			
• Cleaning and disinfection of toilets			
• Cleaning and disinfection of changing rooms			
• Cleaning and disinfection of sports equipment			
• Cleaning and disinfection of restaurant areas (if any)			
WASTE			
• Pedal-operated bins			
• Waste management			
REGULATIONS			
• Regulations for the use of facilities			
• Restriction on capacity			
• Previous appointment			

INFORMATION MEASURES			
• Informative signs			
• Informative talks			
• Staff training			
SPECIFIC RECOMMENDATIONS			
HEALTH MEASURES AT THE ACCESS AND FOR THE USE OF THE FACILITIES			
• Setting up access points			
• Control of the flow of people			
• Daily entry and exit control records			
• Incident records			
• Visible sign with the facility access protocol			
• Provision of disinfection materials			
• Social distancing informative signs placed throughout the different areas			
• Facilities disinfection shifts			
• Venue capacity limitation			
• Promotion of remote working			
• Telematic procedures			
• Telematic payment			
• Management of accommodation areas (if any)			
• Specific measures for disciplines for disabled athletes			
HEALTH MEASURES FOR TRAINING SESSIONS			
• Medical monitoring of athletes as regards COVID-19			
• Practice sessions attendance control			
• Indications to use or not to use masks where required			
• Sports facilities usage guidelines			

• Equipment usage guidelines			
• Other measures			
HEALTH MEASURES FOR COMPETITIONS			
- RISK ASSESSMENT:			
• Expected number of participants, including athletes, coaches, and audience.			
• Outdoor or indoor facilities			
• Level of contact			
- PREVENTIVE MEASURES TAKEN			
ATHLETES AND FACILITIES			
• Mandatory use of masks or not			
• Equipment shared usage guidelines			
• Periodic disinfection of the facilities			
• Signs in the facilities			
• Locator form			
• Prior to the competition, the temperature of the athletes is taken			
• Health measures for competitors			
• Distancing measures in competition observed			
SUPPORT STAFF AND AUDIENCE			
• Venue capacity limitation			
• Assessment of persons at risk			
• Training of support staff			
• Distance between persons in the audience			
• Use of masks
